11:00 - 11:30

Overview of 1992-1999 Baseline Monitoring Features

Carlton Hunt, Battelle

11:30 - 12:00

Questions and Discussion

12:00 - 1:00

Lunch (on your own)

1:00 - 3:30

MEG Discussion and Comments for the Final MEG Report

Adjourn

Issues for MEG to Consider:

1. Comments on the final 1999 BEM Report.
2. Is the model adequate as it is currently formulated?
3. If not, any suggestions for additional model development?

4. Should additional baseline years be run, and if so, which years?
5. Comments on the model's boundary conditions.
6. Are there any other types of models which could help interpret the outfall monitoring data?
7. What is the appropriate "home" institution/agency for the BEM?
